

**HEATING CARPET  
FOR INDOOR**

# HEATING CARPET FOR INDOOR

## DESCRIPTION

Heating carpet with controllable intensity, creating comfortable areas in places difficult to get heated. Due to quick laying and removal of the product, it is possible to start heating rapidly creating a comfortable area for people using it. Ideal for heating in event halls.

## NO HARMFUL ELECTROMAGNETIC EMISSIONS

## FUNCTIONAL CHARACTERISTICS

Heating carpet, perfectly stable due to anti slippery rear surface, is laid directly on the floor. The dimensions are made on particular request. Maximal operational temperature is 30/35°C. For ambient temperature control and energy saving, the product is delivered with intensity controller, on request.

## CARBON FIBER

Carbon fiber is flexible, does not oxidize, does not produce harmful electromagnetic fields during electricity flow, has no dimensional variations as the temperature changes nor deterioration of ohmic values. No wearing and no maintenance required. Its high resistivity permits significant energy savings.

HEATING CARPET IN A PLACE OF WORSHIP

ROLLED CARPET

ANTI SLIPPERY LAYER

## STRATIFICATION

Stratification starting from outside layer:

- Moquette red bordeaux.
- Carbon Fiber resistors.
- Insulating layer, 5.00 mm thickness.
- Anti slippery layer.

## TEMPERATURE CONTROL

T757 controller for temperature optimization delivered on request.

MODEL	POWER SUPPLY	POWER	PROTECTION DEGREE	TEMPERATURE CONTROL	POWER CABLE	DIMENSIONS (cm/in)
TAPI.X	230 Vac 50/60 Hz	200 W/m <sup>2</sup>	IP67 RF Class 1	T757 controller (optional) Surface temp. 30/35°C	Power cable H07 RNF 3G	on demand

CONFORMITY

This product is manufactured in conformity with the electrical safety standards set by low voltage norm 2006/95/CE. This product is in conformity with norm 2004/108/CE, concerning the standards for electromagnetic emissions.
